

Some organisations have concerns over sensitive information being recovered when their equipment is recycled. With Express IT Recycling you can be assured that your data will be completely removed before the hard drives are reused.

Data protection guidelines demand that it does not contain any recoverable confidential data.

At Express IT Recycling recovered equipment has data deleted to a very high standard using a method developed by the US Department of Defence to ensure that files are permanently removed from the drives.

This ensures complete neutralisation of data and peace of mind that you are fully complying with WEEE regulations and data protection legislation.

You must ensure, that whatever disposal route you choose, the WEEE requirements are complied with or you are liable to investigation by the environmental agency. At Express IT Recycling we work closely with your business to ensure you are fully protected.

We can help every step of the way so that your equipment is disposed of in a lawful and ethical manor.

Express IT Recycling are an independent provider of managed Recycling solutions.

We can pull resource from all of the Express IT group in order to provide user friendly, energy efficient and cost effective solutions to all aspects of Industrial, Commercial and Domestic fronts

Our Engineers will certify that any files which was left on the drive has been wiped to our standards and a certificate will be issued.

The certificate comes complete with a break down of what drive it was, how much data was on before the procedure takes place. How much data is on after the procedure. A date and time stamp. Where the drive was taken from. The size of the drive etc... You get a comprehensive break down of all the relative information.

Where further destruction is required, we can supply a disk crushing machine which breaks a hard disk drive into small pieces (like a stone crusher).

The disk crushing machine can be taken to a clients site (dependent on number of drives to be destroyed) so that all destruction is undertaken on the clients site for a more comprehensive service

- Equipment Removal
- Specialised Services
- WEEE Regulations Compliance
- Fully Accredited
- Fully Licensed by EA
- Reputable Company
- Conforming Certification
- Specialist recycling
- On-Site Services
- Pick up Service
- Recycling Equipment
- Asset Management
- Tailored Solutions

“Whatever the size of the task at hand you can rely on Express IT to provide the optimum solution. Our combined expertise, experience and interaction all fuse together to encompass a future proofed conclusion for tomorrows needs today”
