

Express IT Services was initially formed to provide specialised ICT services in the north of England.

With the stringent demands on reliability and project cost management, Express IT ensure your projects are delivered on time and within budget.

Our business ethic of providing excellent service has sustained the business ensuring growth over the past 15 years.

We have applied this philosophy in developing IT support and audio visual solutions throughout the public sector, in education with PFI landmark schools and local authorities throughout the north.

Our knowledge and experience ensures the smooth implementation of major projects combining the peak demands in the education sector during school holidays with lower availability of personnel.

Our teams operate utilising crisis and risk management planning techniques to proactively avoid problems rather than recover from them.

You often have to deliver major infrastructure changes during a narrow window (e.g.: during holidays), and you need to be confident your service provider understands the criticality of delivery on time and within budget. We guarantee our projects achieve both.

Express IT Services are an independent provider of managed network solutions.

We can pull resource and buying power from all of the Express IT group in order to provide user friendly, energy efficient and cost effective solutions to all aspects of Industrial, Commercial and Domestic fronts

We endeavour to develop long term relationships providing support to organisations who are seeking the quality of service and reliability of equipment which underpins services in the health, education and local government sectors.

We can provide a flexible resource to supplement your internal resource during peaks without you needing enhanced internal manning levels.
