

As the name suggests, “Game Keepers Cottage” required the Design, Installation and Commissioning of the project to encompass the feel of the conservation Area in which it Resided.

Express IT were involved right from the planning stage of the full build project.

Close liaison with the client and construction team were needed in order to apply the modern infrastructure in such a way that was transparent to the sympathetic refurbishment and contemporary feel of the building.

Engineers completed the design, installation and commissioning of the project which encompassed state of the art lighting, sound, vision, cinema room, wireless integration and fully networked bespoke system.

“When you are spending this amount of money on something as close to your heart as your home then you need a professional company who are flexible and at the top of their field.

Express IT provided everything asked of them and more. Unreservedly recommended” M Tsang RS Developments
