

Standing proud for more than 600 years, the magnificent spectacle of Lumley Castle dominates the County Durham landscape. Surrounded by beautiful parklands overlooking the River Wear and Durham County Cricket Ground, Lumley Castle is a magnificent monument to a bygone age of chivalry and honour.

Lumley Castle Hotel has completed a major investment programme to provide guests with unlimited free access to the very latest WiFi (wireless) Internet service.

Now, guests can take advantage of the Internet wherever they are in the Hotel.

Mohammad Ahmad, IT Manager for No Ordinary Hotels, said the introduction of WiFi is part of a wider plan to enhance their range of services for guests.

"Often simple solutions are not easy to implement in such historic buildings and I'm delighted that we're now able to offer this free service which can benefit leisure guests and conference guests alike."

Express IT worked closely with the Lumley Castle Staff in order to provide the Fibre Optic Backbone, Structured Cabling, Hardware, Software and IT Management Services for the Entire Network Infrastructure.

- Grade I Listed Building
- Networked Conference Rooms
- Sympathetic installation working with English Heritage
- Stringent Timetable for scope of works
