

Express IT Computer Centre is not only a retail outlet but also a Maintenance, Service, Upgrade and Repair centre for PC's, Laptops, Monitors, Printers and Computer related equipment.

We have found that most PC users find it hard to diagnose problems whether hardware or software related. Just say you find the problem the next issue is to rectify the problem.

Express IT can eradicate all the issues for you. We are an accredited service, repair and upgrade centre for various manufacturers.

Most PC's require regular maintenance and servicing in order to keep them operating smoothly and to their optimum potential.

Is your PC running very slow, freezing, not booting up?

Is your internet connection running slow, cant get more than one PC to connect to the internet? Plagued by adware and spyware?

Express IT Computer Centre have highly trained staff who deal with computer related issues on a daily basis.

We have retail outlets each with its own service centre. We can advise, supply and install the appropriate upgrade for your machine.

Because we also have retail outlets we have a vast range of PC components and peripherals readily available on the shelf

Express IT Computer Centre are an independent provider of managed Computer solutions. We can pull resource from all of the Express IT group in order to provide user friendly, energy efficient and cost effective solutions to all aspects of Industrial, Commercial and Domestic fronts

Why should my PC have a Health-Check or Service?

It may help avoid costly computer repairs or data loss by detecting failing components.

Improves efficiency and performance.

Helps keep the computer running cleanly, quietly and within recommended temperature ranges.

What does a Health-Check or Service include?

A thorough cleaning of the computer casing inside and out.

Checking & cleaning cooling fans on the CPU, Northbridge and Graphics Card (replacing or lubricating where necessary).

Checking motherboard for leaking, bulging or blown capacitors.

Hardware diagnostics including: motherboard, memory, hard-drive and processor.

Software updates checked and applied if necessary.

Disk scan for corrupted or damaged files & sectors.

A full scan for viruses, trojans and spyware.

Disk Cleanup to remove unneeded temporary files and other unwanted 'buildup'.

Disk Defragmenting for improving disk performance.

Consulting with you about possible performance enhancements including removing unnecessary programs at 'start-up' and adding memory etc.
